

## **Royal Poinciana, Flamboyant**

Scientific Name: *Delonix regia*

1- Boil water

2- Remove the boiling water off the stove

3- Add the seeds into the boiling water

4- After a couple of minutes slowly add cold water until the temperature drops and the water should feel very hot but not burning

5- Leave the seeds in the water overnight

6- After 24 hours the membrane covering the seeds should peel by themselves

7- Put in moist potting soil
